Provisional data

The statistics in this report are produced quarterly. Figures for the first three quarters in an academic year are provisional because they are based on earlier freezes of the Lifelong Learning Wales Record (LLWR). This data will continue to be updated until the final freeze in December after the end of the academic year.

The provisional figures for the year are finalised when quarter 4 (May to July) data are published in February/March each year, based on the December freeze.

Target measure starts

The statistics for the target measures use a more rigorous measure of apprenticeship programme starts than other statistics in this output. This measure takes account of early drop outs (within first 8 weeks) and transfers between apprenticeships.

Degree apprenticeships are now included in the current target measure. Degree apprenticeships in Wales provide the opportunity to combine working with part-time study at university. Data is sourced from the Higher Education Statistics Agency (HESA). Whilst statistics from HESA have been calculated to be as comparable as possible with statistics for other apprenticeship programmes sourced from the LLWR (for example, removing early drop outs), some methodological differences will remain. Unlike the LLWR, HESA data is only available annually and statistics for the latest available academic year will be included in every Q4 update.

More quality information

Other than the provisional data and the target measure, these statistics are produced in the same way as the statistics in the [Further education, work-based learning and community learning annual reports](#). More information can be found in the quality section of those reports.

Statement of compliance with the Code of Practice for Statistics

Our statistical practice is regulated by the Office for Statistics Regulation (OSR). OSR sets the standards of trustworthiness, quality and value in the Code of Practice for Statistics that all producers of official statistics should adhere to.

All of our statistics are produced and published in accordance with our [Statement of Compliance with the Code of Practice for Statistics](#) and other [statistical policies](#).

These official statistics demonstrate the standards expected around trustworthiness, quality and public value in the following ways.

Trustworthiness

This is produced by professional statisticians complying to the Code of Practice for Statistics. Release dates are pre-announced, protocols around data confidentiality are followed.

Quality

The data is sourced from the Lifelong Learning Record Wales which is submitted by learning providers. This data is also used to determine funding for learning providers and is subject to audit.

When the data is submitted it must meet certain validation rules. When the statistics are being produced quality checks are undertaken by the statisticians.

Value

These statistics provide a quicker insight into the uptake of apprenticeships in Wales than the annually produced reports. They are used for monitoring and evaluating the sector. They report the progress against a target set by Welsh Government.
